We all want a
bigger Marketshare
for the Linux
Desktop!

more PCs with free
software

right ?

How can we
achieve this ?

People need an
opportunity to buy PCs
with OUR Software

Today most PCs ship
with **proprietary**
Operating Systems

A look at current Linux PC

- EEE PCs -> sh&%\$ Software
- Dell -> outdated Software
- Acer -> Linspire

- Bad Support
- Suboptimal Drivers

We can do better!

Imagine we
design and build

OUR own PC

Today we are
announcing...

Ö öpen-pc

A "real" Linux PC
from the Community
for the Community

price between

\$300 and \$400

Today starts a vote
about the Hardware and
Software on:

<http://open-pc.com>

Integrated Online-Services

Great Hardware and
Software Integration

Community Support

App Store

Part of the income goes
to Free Software
Projects

One Hardware Vendor

Handles Production and
International Shipment

Looking for more
partners!

Will ship
this fall!

Thank you
